Professional Summary

B. Tech graduate in **Electronics and Computer Engineering** who loves turning complex problems into smart, real world solutions. I specialize in machine learning and healthcare technology, having built **cancer detection and diabetic retinopathy diagnosis systems**. My toolkit includes **Python, TensorFlow, and various AI frameworks** I've used to process thousands of medical images and create meaningful impact in healthcare. Along with AI, I have **hands-on experience in full-stack development, building end-to-end web applications** with user-friendly interfaces. I also enjoy **exploring cybersecurity and IoT development**, and I'm looking for an opportunity to join a team where I can contribute my technical skills while continuing to learn and grow in the exciting world of technology

Technical Skills

- **Programming Languages:** Python, C++, SQL.
- **Machine Learning:** Deep Learning (Architecture, Transformers), NLP, Computer Vision & Image Processing, Regression, Classification and unsupervised models.
- **Web Development:** HTML5, CSS3, JavaScript, React.js, MongoDB, Node.js Responsive Web Design, UI Component Development
- **Tools & Platforms:** Git & GitHub, MYSQL, AWS, VS Code, Adobe, MS Office Suite, IOT, Power bi, Browser Developer Tools.
- **Cybersecurity:** Penetration Testing (Kali tools), Network Security Fundamentals, Linux.
- **Soft skills:** Problem-Solving, Adaptability and Flexibility, Work Ethic and Reliability.

Education

Bachelor of Electronics and Computer Engineering SRM Institute of Science & Technology, Ramapuram.	2021 - 2025 CGPA: 7.47
Higher Secondary Education, Velammal Matriculation Higher Secondary School, Ponneri.	2019-2020 Percentage: 74
Secondary Education, Velammal Matriculation Higher Secondary School, Ponneri.	2018 - 2019 Percentage: 88

Projects

Diabetic Retinopathy Disease Detection Using Deep Learning

- **Technologies Used:** It involves CNN models like ResNet trained on retina images using frameworks like TensorFlow, with image preprocessing, data augmentation, and evaluation.
- Ultimately, this AI-driven approach has the potential to transform DR detection, making eye care more efficient and accessible for those at risk.
- Constructed **Data Delivery Pipelines** to preprocess and standardize over 1,000+ retinal images, ensuring 100% data consistency for analysis.
- Performed rigorous **Data Validation** and cleaning on raw medical datasets to remove artifacts before processing.
- [GitHub Repository](#)

Tiny Link – URL Shortener Web Application

- **Technologies Used:** Built using **Angular 21, TypeScript, Node.js, Express.js, MongoDB, JWT Authentication, Socket.IO, REST APIs, HTML, CSS, and SCSS.**
- Designed and implemented a **Role-Based Access Control (RBAC)** system with secure login, registration, JWT authentication, and separate **Admin** and **General User** access levels.
- Built interactive modules including **Dashboard Analytics, User Management, Fraud Detection, Audit Logging, and Real-Time Notifications**, enabling centralized enterprise monitoring and governance.
- [GitHub Repository](#)

Certifications

- Python - GUVI
- C programming – Bharathidasan University (IECD)
- Course on PSpice - Livewire
- IOT using Smart Devices - TVS Training
- PostgreSQL bootcamp - Udemy
- Dark web - GUVI
- Ethical Hacking(Tools) – GUVI

Workshops / Trainings

IOT using Smart Devices - TVS Training

- The workshop conducted by the TVS training we worked on interfacing several different sensors with Arduino UNO
- **Project:** Developed a Smart Pill Box System for bipolar disorder patients using IoT, which automated medication reminders and management.

Hands-on Experience on livewire

- Gained hands-on experience with PSpice and Livewire for circuit simulation and analysis. Designed and tested various analogue and digital circuits, ensuring accurate performance evaluation.

Ai Tools Workshop

- Attended the be10X AI Tools Workshop, gaining hands-on experience with AI-powered productivity tools.
- **Key skills:** AI Automation, Generative AI, AI-powered Data Analysis, Prompt Engineering.

Novi Tech R&D Pvt Ltd

- Attended the 30 days Full Stack Development Workshop, gaining hands-on experience with Web-application productivity tools.
- **Key skills:** HTML, CSS, JavaScript, React , Node , MongoDB.

Activities

Student Coordinator for ELEXCA'24:

- Ensured the smooth operation of technical events, as student coordinator of the ELEXCA'24 symposium conducted by the ECE department at SRM Institute of Science and Technology – Ramapuram
